

Pharmacy Point of Sale (POS) (Sample screen)

The POS system is an online, real time, pharmacy claims processing system. Since the POS is online, each attempt to process a claim will appear on your Remittance and Status Report (RA). Pharmacies can choose to use the online POS system or submit claims through hard copy billing (paper claims). All prescription drug claims are processed through the POS system regardless of how they are submitted.

*** M2 is the exception code that post when a restricted client goes to a pharmacy he/she is not assigned to.**
